SUMMARY

Full stack engineer with 8+ years shipping production web and mobile platforms. Seven years at InvestCloud supporting API integrations for 50+ financial institutions — promoted through four roles. Founder and technical lead of a trading-journal SaaS and an App Store-shipped discovery platform; a GA instructor who has taught 150+ engineers to ship full-stack products. Seeking a senior role where I own architecture decisions and help shape technical direction.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native (Expo),
TypeScript, Tailwind CSS, Redux Toolkit

Cloud & DevOps: AWS (Lambda@Edge, S3, CloudFront),
Docker, CI/CD, Vercel, Serverless Framework

APIs & Tooling: REST APIs, GraphQL, Postman, SQL
(PostgreSQL, MySQL), Unit Testing, Technical Training

Backend & Data: Node.js, Express, Supabase,
PostgreSQL, Firebase, GraphQL (Apollo, Hasura), Django,
MongoDB, ETL Pipelines, Data Modeling

AI & Integrations: OpenAI API, RAG / Vector Search, LLM
Integration, Prompt Engineering, Stripe, Twilio, Polygon.io

PROFESSIONAL EXPERIENCE

Technical Trainer & Software Engineer · InvestCloud Inc.

July 2018 – June 2025

Enterprise fintech platform serving 50+ financial institutions · Promoted through four roles over seven years

- Owned API integrations across 50+ financial institutions — resolving issues for 100+ developers globally and cutting resolution time by 40% through runbooks and repeatable workflows.
- Led technical training and onboarding on REST/SOAP integration patterns and platform architecture, shortening new-developer ramp-up across global engineering teams.
- Built internal tooling and ETL pipelines with PostgreSQL, MySQL, Python, and Groovy, cutting integration setup time by 40%.

Software Engineering Instructor & Curriculum Developer · General Assembly

October 2020 – Present

Part-time · 9+ cohorts · 150+ students

- Owned full-stack curriculum delivery for 150+ students across 9+ cohorts (React, Node.js, Express, MongoDB, Python, Django), and led interview-prep workshops that consistently landed students in their first engineering roles.

Lead Full Stack Engineer (Contract) · That Aisle

October 2024 – Present

Hair care product discovery app · iOS & Android · App Store

- Lead engineer and sole technical advisor — own architecture, data modeling, and platform strategy as the developer of record.
- Rebuilt and shipped the production React Native app to React Native 0.81 and React 19 (TypeScript, Redux Toolkit, Firebase) and migrated the product catalog to a Firestore schema supporting 3,500+ products with full-text search.
- Designed and built a React + Vite admin dashboard (14 pages) covering content moderation, user management, push notifications, catalog, and partnership tracking.

Founder & Full Stack Engineer · Daily Wick

April 2025 – Present

Own product · Trading journal SaaS for active & prop traders · Solo technical founder

- Own the product end to end — architecture, build, deploy — on a SaaS that turns raw trade logs into data-backed coaching.
- Built on Next.js 16, React 19, TypeScript, and Tailwind, with Supabase auth and PostgreSQL row-level security.
- Designed a retrieval-augmented AI coach: OpenAI embeddings on closed trades via pgvector, grounding analysis in each trader's own logged history.

Full Stack Engineer (Contract) · Simmr

July 2023 – December 2025

Social discovery platform · 2,000+ active users

- Owned API design, schema migration, and infrastructure for a platform serving 2,000+ active users (Node.js, Apollo GraphQL, Hasura, PostgreSQL, AWS).

Co-Founder & CTO · TOLO

October 2022 – January 2025

Mobile content discovery platform · App Store-launched

- Led technical execution from zero to App Store launch — React Native (Expo), Supabase, and a viral-ranking algorithm that improved feed performance by 40% via SWR caching.

ADDITIONAL & EDUCATION

BBDO Los Angeles — Jr. Front End Developer (2017–18) · **Airbnb** — Front End Developer (2017). **General Assembly** — Web Development Immersive (2017).
