

Billie Paul Heidelberg Jr.

Full Stack Engineer

Los Angeles, CA · 323-683-0033 · billie@houseofheidelberg.com · github.com/theamazingmrb · linkedin.com/in/bheidelberg · billieheidelberg.com

SUMMARY

Full stack engineer with 8+ years building production web and mobile platforms across React, Next.js, Node.js, and PostgreSQL. Founded a trading journal SaaS, ships iOS/Android contract work, and spent seven years at InvestCloud supporting 100+ developers on enterprise API integrations at scale. Comfortable deep in distributed systems and explaining complex issues to non-technical stakeholders. Actively seeking a full-time senior engineering role.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, TypeScript, Tailwind CSS

Cloud & DevOps: AWS (Lambda, CloudFront, S3, SQS), Docker, CI/CD, Serverless Framework

APIs & Tooling: REST APIs, GraphQL, Postman, JSON, SQL (PostgreSQL, MySQL)

Backend & Data: Node.js, Express, Supabase, PostgreSQL, Redis, MongoDB, ETL Pipelines, Data Modeling

AI & Integrations: OpenAI API, LLM Integration, Prompt Engineering, Stripe, Twilio, Firebase, Polygon.io, Mixpanel

Other: Python, Groovy, Unit Testing, Technical Documentation, Cross-functional Collaboration

WORK EXPERIENCE

Founder & Full Stack Engineer · Daily Wick

April 2025 – Present

Trading journal SaaS platform for prop traders · Beta · Actively in development

- Built full-stack trading journal platform using Next.js 16, React 19, TypeScript, and TailwindCSS with Supabase and PostgreSQL backend.
- Developed trade analytics dashboard with candlestick chart visualization and market data integration via Polygon.io.
- Integrated OpenAI API with custom prompt engineering to surface AI-generated insights on trade patterns, execution quality, and psychological tendencies tied directly to P&L data.
- Designed relational database schema with row-level access control supporting secure multi-user SaaS architecture.
- Built automated CSV trade importer supporting multiple broker platforms, with header detection logic that identifies the source platform and maps records into the database schema automatically.

Lead Full Stack Engineer (Contract) · That Aisle

October 2024 – Present

Hair care product discovery app · iOS & Android · App Store

- Rebuilt and upgraded production React Native app (iOS/Android) to React Native 0.81 and React 19 with TypeScript, Redux Toolkit, and Firebase backend.
- Migrated client's product catalog from Excel to a structured Firestore schema, supporting 3,500+ products with full-text search, filtering, and virtual scrolling for performance.
- Built React + Vite admin dashboard with 14 management pages covering content moderation, user management, push notifications, product catalog, and partnership tracking.
- Implemented push notification system with Firebase Cloud Messaging, Firebase Functions, and FCM token management with real-time notification history.
- Engineered community forum with nested comments, barcode/QR scanning, emoji reactions, and a content moderation system with soft-delete and audit trails.
- Served as sole developer and technical advisor, guiding client on architecture decisions, data modeling, and platform strategy throughout two phases of development.

Full Stack Engineer (Contract) · Simmr

July 2023 – December 2025

Social discovery platform · 2,000+ active users

- Designed and built APIs using Node.js, Apollo GraphQL, and Hasura supporting real-time platform features.

- Implemented notification systems and asynchronous job workers for event-driven messaging and platform alerts.
- Managed PostgreSQL schema migrations and built internal analytics workflows for operational visibility.
- Integrated third-party services including Twilio, Stripe, Mixpanel, and AWS SES for messaging, payments, and analytics.
- Deployed infrastructure using Docker and Serverless Framework to improve release consistency and environment reliability.

Co-Founder & CTO · TOLO

October 2022 – January 2025

Mobile content discovery platform for independent artists

- Led end-to-end development of React Native (Expo) mobile app with Supabase backend — real-time subscriptions, role-based access, and media upload infrastructure.
- Built viral content ranking algorithm and improved feed performance by 40% through SWR caching.
- Directed sprint planning, code reviews, and iOS/Android deployments via Expo Application Services.

Software Engineering Instructor & Curriculum Developer · General Assembly

October 2020 – Present

Full-time & part-time Web Development Immersive · 9+ cohorts

- Taught 1 full-time and 8+ part-time Web Development Immersive cohorts, instructing 150+ students in full-stack engineering across React, Node.js, Express, MongoDB, Python, and Django.
- Contributed to curriculum development for full-stack engineering programs, covering modern frameworks, software design patterns, and industry best practices.
- Led interview prep workshops and pop-up lectures on technical interviewing, whiteboarding, and job search strategy for students entering the engineering job market.
- Mentored students through capstone projects, code reviews, and career transitions into software engineering roles.

Technical Trainer & Software Engineer · InvestCloud Inc.

July 2018 – June 2025

Enterprise fintech platform serving 50+ financial institutions · Promoted through four roles over seven years

- Debugged and resolved API integration issues for 100+ developers globally across REST services and data pipelines, cutting average resolution time by 40% through structured documentation and repeatable diagnostic workflows.
- Investigated production data inconsistencies and system failures across distributed services, identifying root causes and implementing fixes.
- Built internal tooling and ETL pipelines using PostgreSQL, MySQL, Python, and Groovy to automate operational workflows and reduce integration setup time by 40%.
- Partnered with engineering and product teams to diagnose platform issues, escalate defects, and validate fixes prior to release.
- Led technical training sessions for developers on API integration patterns, debugging strategies, and platform architecture.
- Authored internal documentation and operational runbooks used by engineering teams globally.

ADDITIONAL EXPERIENCE

Jr. Front End Developer, BBDO Los Angeles · 2017 – 2018

- Developed interactive web components and digital advertising assets for major brand campaigns using HTML, CSS, and JavaScript.

Front End Developer (Contract), Airbnb · 2017

- Built and modernized frontend UI components for Airbnb's host management platform, improving the host onboarding and listing management experience.
-
